

304 Stainless Steel Coil

304 stainless steel, also known as 18-8 stainless steel, is a non-magnetic alloy containing 18% chromium and 8% nickel. It is the most widely used grade of stainless steel that combines high strength and corrosion resistance. Ningbo Qihong Stainless Steel Co., Ltd. is specialized in stainless steel coils. Among them, 304 stainless steel coil is one of the most popular products. We supply a wide range of 304 stainless steel coils with high quality and affordable prices, which is your best choice.

304 stainless steel coil is a low carbon, molybdenum-containing austenitic stainless steel coil. Its chemical composition is at least 18% chromium and 8% nickel. Due to its high chromium content, it is resistant to corrosion by many chemicals. 304 stainless steel coil also has good machinability and can be machined or ground without difficulty, but should not be used for deep drawing operations because the amount of strain hardening of the surface can cause the material to become brittle. In addition to the above properties, 304 stainless steel coils have excellent uniformity and are easy to manufacture. 304 stainless steel coil will not harden after heat treatment, non magnetic.

Product Parameter (Specification)

Material	304
Surface	NO.1, NO.4, 2D, 2B, BA, 6K, 8K, Mirror, etc
Thickness	0.02mm-4.0mm/Customized
Length	10-12000 mm or as requirement
Width	1000-6000 mm or as requirement
Standard	ASTM, JIS, GB, AISI, DIN, BS, EN
Certifications	SGS ISO9001
Packing	Industry standard packaging or according to client's requirement

Brand	TISCO, POSCO, BAO STEEL, TSINGSHAN, QIYI STEEL etc .
Payment terms	L/C, T/T
Delivery time	Up to order quantity, contact us to know

Product Feature And Application

304 stainless steel coil is a common steel in stainless steel. Its advantageous properties are high temperature resistance, excellent processing performance and good toughness, so it is often used as a steel. Commonly used in life are 304 stainless steel coils, 304 stainless steel pipes and 304 stainless steel sheets and other building materials. As a very important building material, 304 stainless steel is widely used in industry, construction, home decoration , food and medical industries, and it is one of the indispensable materials in life.
